Create a new Repository with Artisan?

PUBLISHED 3 YEARS AGO BY LUDDINUS

How can I create an empty repository with artisan? Like a model. Something like this:

```
php artisan make:repository UserRepository
```

which creates

```php
<?php namespace App\Repositories;

class UserRepository extends BaseRepository {

    //

}
```
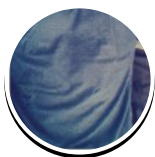

toniperic 3 years ago   (143,285 XP)

Just look at `Illuminate\Foundation\Console\ModelMakeCommand` and you can mimic it to suit your needs.

luddinus 3 years ago   (24,420 XP)

@toniperic Thx 4 the quick response.

pmall 3 years ago   (547,595 XP)

Yes there is no built in command to create a repository if you want this you have to create your own.

bobbybouwmann 3 years ago   (1,151,795 XP)

The repository pattern is not connected to the framework, but it sure made it a lot more popular! It would be nice to have a generator for it though :P
